

GRABO PRO Battery Vacuum Lifter With Gauge and Bag - 170kg (Model: B0007)

- Grabo has 170kg Capacity with Glass and other air tight, smooth surfaces.

- The pro features a new digital vacuum gauge for increased safety. Automatically turns off when the sufficient vacuum level is reached and on if the vacuum level drops.

- Grabo adheres to rough surfaces, where traditional suction cups are only capable of creating a good seal with flat, clean and airtight surfaces such as glass.

- Supplied with one battery and charger as standard

- The maximum surface roughness which Grabo can attach to depends on the exact *Profile roughness parameters* (The geometry of peaks and valleys in the material), and is generally limited to an amplitude of about 2.5mm (0.1 inch).

- This capability allows Grabo to create a seal with the majority of patterned tiles, pavers and construction materials such as drywall, plasterboard, slabs, tiles etc.

Attributes:

Product Code: B0007

Unit Of Sale: Each

Model	GRABO Pro (B0007)	 
Cauge type	Smart digital pressure sensor (PSI, bar, kg, lb)	
Green switch type	Automatic pressure maintaining on/off	
Handle type	Ergonomic (35mm Ø)	
Rated power	16W	
Charger input voltage	100-240VAC 50/60Hz	
Battery charging time	~2hrs	
Non-stop running time	90min	
Battery	14.8VDC 2600mAh Li-Ion	
Battery stand by	30 days	
Pump service life	100,000+ on/off cycles / 800+ hrs continuous action	
Rated air flow	0.7cfm (20 L/min)	
Maximum vacuum rate	11.6PSI (0.8 Bar, 90kPa)	
Maximum lifting capacity	170kg	
Working temperature	0°-60°C	
Kit contents	1 x seal, 1 x battery, 1 x charger, 1 x fabric bag	
Warranty	1 year warranty as outlined on www.thegrabco.co.uk/warranty	
Net weight (with battery)	15kg	
Dimensions (LxWxH)	300 x 156 x 127mm
