

GCC Glass Door Hydraulic Bottom & Top Patch Fitting Kit (Model: KGT100SS-HO-KIT)

Easy to install and adjust hydraulic floor spring that saves the need to dig holes in floors to sink the conventional floor spring.

More economical also than the conventional floor spring as the hydraulics are built in to the patch fitting.

Supplied with a matching top patch fitting and top pivot.

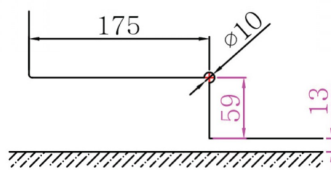

Please note that the glass processing drawings will differ from previous versions for this updated and upgraded model
