Solar 101 Film 76% Inside 1.22 x 10mtrs Silver (Model: Q0044)

• The solar protection adhesive film allows overcoming the greenhouse phenomenon effectively. This film rejects 75% of solar energy and reduces the overheating keeping the external vision. It is a real factor for improved comfort.

• The solar protection adhesive films are composed of 2 layers of vacuum-metalized polyester, an adhesive and a protective film (which is to be removed while installation). They are scratch-proof.

• For all types of mineral or synthetic glass exposed to the sun.

• Internal surface with soapy water.

• Solution of soapy water, 30 days after installation. Products that could scratch the film should not be used. Do not put stickers or any other adhesives on the film.

• 15 to 20 years for vertical application in Central Europe.

• 2 years from the delivery. This film should be kept away from excessive moisture and away from direct sunlight at temperature below 38Â° C.
