

200 x 200 Fanlight (Model: QRF40)

- Adding the personal touch of a leaded, coloured glass effect to a fanlight is very simple to achieve. Our definitive range of styles is inspired by the decorative influences of past ages and includes classical and traditional floral designs as well as "art nouveau" and contemporary images.

- Each design is carefully prepared using high specification, colour-stable polyester film with built-in UV inhibitors and natural finish pure lead strip. The designs are equally as effective when applied to clear or patterned glass.
