

Video 1 80 x 80mm ( Model: RVA50 )

Stained Glass Art Films are printed or embossed onto high quality polyester base materials using UV stable inks and are easy to apply to glass, plastic and other materials. They can even be applied to curved surfaces and are guaranteed not to fade, crack or delaminate. The Stained Glass Art Film palette contains a vast selection of colours and textures to appeal to most tastes, and suit all applications, from traditional to contemporary. Applications include domestic and commercial windows, doors, ceilings; mirrors, furniture and cabinets, and obscurity levels vary from transparent to opaque, for areas where privacy is required such as bathroom windows. Screen images may appear different from the actual film.
